Official Standard of the Miniature Schnauzer

General Appearance: The Miniature Schnauzer is a robust, active dog of terrier type, resembling his larger cousin, the Standard Schnauzer, in general appearance, and of an alert, active disposition. Faults - Type - Toyishness, ranginess or coarseness.

Size, Proportion, Substance: Size - From 12 to 14 inches. He is sturdily built, nearly square in proportion of body length to height with plenty of bone, and without any suggestion of toyishness. Disqualifications - Dogs or bitches under 12 inches or over 14 inches.

Officers 2026

President: Sue Quinn
Vice Pres.: Beth Santure
Secretary: Sue Procter
Treasurer: John Schauer

Head: Eyes - Small, dark brown and deep-set. They are oval in appearance and keen in expression. Faults - Eyes light and/or large and prominent in appearance. Ears - When cropped, the ears are identical in shape and length, with pointed tips. They are in balance with the head and not exaggerated in length. They are set high on the skull and carried perpendicularly at the inner edges, with as little bell as possible along the outer edges. When uncropped, the ears are small and V-shaped, folding close to the skull. Head - strong and rectangular, its width diminishing slightly from ears to eyes, and again to the tip of the nose. The forehead is unwrinkled. The topskull is flat and fairly long. The foreface is parallel to the topskull, with a slight stop, and it is at least as long as the topskull. The muzzle is strong in proportion to the skull; it ends in a moderately blunt manner, with thick whiskers which accentuate the rectangular shape of the head. Faults - Head coarse and cheeky. The teeth meet in a scissors bite. That is, the upper front teeth overlap the lower front teeth in such a manner that the inner surface of the upper incisors barely touches the outer surface of the lower incisors when the mouth is closed. Faults - Bite - Undershot or overshot jaw. Level bite.

Neck, Topline, Body: Neck - Strong and well arched, blending into the shoulders, and with the skin fitting tightly at the throat. Body - Short and deep, with the brisket extending at least to the elbows. Ribs are well sprung and deep, extending well back to a short loin. The underbody does not present a tucked up appearance at the flank. The backline is straight; it declines slightly from the withers to the

Miniature Schnauzer Club of Michigan Meeting

Saturday, June 6, 2026

At

ANN ARBOR DOG TRAINING CLUB

1575 E North Territorial Rd

Whitmore Lake, MI 48189

1 p.m.

In Room 1

Meeting following Potluck lunch

Scent work & exercise obstacle course for the dogs!

Bring lots of small soft treats for your dog.

DOGS ARE WELCOME.

BRING YOUR OWN CHAIR & DOG CRATES IF NEEDED.

Please RSVP Sue by email at quinndixie@gmail.com or the google group to let her know if you are planning to attend and what dish you are bringing. Thank you!

Club News:

2026 Calendar of Events

June 6 Saturday—General Meeting Time TBA

Ann Arbor Dog Training Club, Whitmore Lake, MI

July 24,25,26 MSCM Agility Trials

All Dogs Can, 2040 N. Lapeer Road, Lapeer, MI 48446

August 19 Wednesday — ZOOM General Meeting 7 pm

September 25 Friday—MSCM Specialty

Monroe County Fairgrounds, Monroe, MI

October 11 Sunday –General Meeting @ Noon

Valiant Restaurant, 1120 S. Main St, Chelsea, MI

December 5 Saturday –General Meeting 4pm

MSCM Meeting/Xmas Party , Coral Gables, East Lansing, MI

Members Dinner will be paid for by club, drinks not included

MSCM Agility Trials

Friday, Saturday, Sunday

July 24,25,26 2026

All Dogs Can LLC

2232 North Lapeer Road

Lapeer, MI 48446

AGILITY TRIAL-Silent Auction Members should bring donation items to the June meeting. These items will be used to prepare our annual raffle/auction at the July agility trial. Already prepared baskets are desired, but not necessary. Individual items are also welcome. Items should be new or "like new" and in clean, good condition. Gift cards are great too! Contact Lynn Baitinger for more info.

There will be lunch/water for workers. Contact Lynn Baitinger at otchmx@gmail.com if you are able to volunteer for Agility. There are many types of jobs that need to be filled, such as bar setter, timer, scribe, gate steward and course builders.

Susan Quinn & Beth Santure. Sat.-Owner Handled Group 2, Sun.-Owner Handled Group 1,
Mon.-Owner Handled Group 2.

base of the tail. The withers form the highest point of the body. The overall length from chest to buttock appears to equal the height at the withers. Faults - Chest too broad or shallow in brisket. Hollow or roach back. Tail - set high and carried erect. It is docked only long enough to be clearly visible over the backline of the body when the dog is in proper length of coat. A properly presented Miniature Schnauzer will have a docked tail as described; all others should be severely penalized. Fault - Tail set too low.

Forequarters: Forelegs are straight and parallel when viewed from all sides. They have strong pasterns and good bone. They are separated by a fairly deep brisket which precludes a pinched front. The elbows are close, and the ribs spread gradually from the first rib so as to allow space for the elbows to move close to the body. Fault - Loose elbows. The sloping shoulders are muscled, yet flat and clean. They are well laid back, so that from the side the tips of the shoulder blades are in a nearly vertical line above the elbow. The tips of the blades are placed closely together. They slope forward and downward at an angulation which permits the maximum forward extension of the forelegs without binding or effort. Both the shoulder blades and upper arms are long, permitting depth of chest at the brisket. Feet short and round (cat feet) with thick, black pads. The toes are arched and compact.

Hindquarters: The hindquarters have strong-muscled, slanting thighs. They are well bent at the stifles. There is sufficient angulation so that, in stance, the hocks extend beyond the tail. The hindquarters never appear overbuilt or higher than the shoulders. The rear pasterns are short and, in stance, perpendicular to the ground and, when viewed from the rear, are parallel to each other. Faults - Sickie hocks, cow hocks, open hocks or bowed hindquarters.

Coat: Double, with hard, wiry, outer coat and close undercoat. The head, neck, ears, chest, tail, and body coat must be plucked. When in show condition, the body coat should be of sufficient length to determine texture. Close covering on neck, ears and skull. Furnishings are fairly thick but not silky. Faults - Coat too soft or too smooth and slick in appearance.

Color: Allowed colors: salt and pepper, black and silver and solid black. All colors have uniform skin pigmentation, i.e. no white or pink skin patches shall appear anywhere on the dog and the nose must be solid black. Salt and Pepper - The typical salt and pepper color of the topcoat results from the combination of black and white banded hairs and solid black and white unbanded hairs, with the banded hairs predominating. Acceptable are all shades of salt and pepper, from the light to dark mixtures with tan shadings permissible in the banded or unbanded hair of the topcoat. In salt and pepper dogs, the salt and pepper mixture fades out to light gray or silver white in the eyebrows, whiskers, cheeks, under throat, inside ears, across chest, under tail, leg furnishings, and inside hind legs. It may or may not also fade out on the underbody. However, if so, the lighter underbody hair is not to rise higher on the sides of the body than the front elbows. Black and Silver - The black and silver generally follows the same pattern as the salt and pepper. The entire salt and pepper section must be black. The black color in the topcoat of the black and silver is a true rich color with black undercoat. The stripped portion is free from any fading or brown tinge and the underbody should be dark. Black - Black is the only solid color allowed. Ideally, the black color in the topcoat is a true rich glossy color with the undercoat being less intense, a soft matting shade of black. This is natural and should not be penalized in any way. The stripped portion is free from any fading or brown tinge. The scissored and clipped areas have lighter shades of black. A small white spot on the chest is permitted, as is an occasional single white hair elsewhere on the body.

Disqualifications - Dogs not of an allowed color or white striping, patching, or spotting on the colored areas of the dog, except for the small white spot permitted on the chest of the black. The body coat color in salt and pepper and black and silver dogs fades out to light gray or silver white under the throat and across the chest. Between them there exists a natural body coat color. Any irregular or connecting blaze or white mark in this section is considered a white patch on the body, which is also a disqualification. Nose any color other than solid black.

Gait: The trot is the gait at which movement is judged. When approaching, the forelegs, with elbows close to the body, move straight forward, neither too close nor too far apart. Going away, the hind legs are straight and travel in the same planes as the forelegs.

Note - It is generally accepted that when a full trot is achieved, the rear legs continue to move in the same planes as the forelegs, but a very slight inward inclination will occur. It begins at the point of the shoulder in front and at the hip joint in the rear. Viewed from the front or rear, the legs are straight from these points to the pads. The degree of inward inclination is almost imperceptible in a Miniature Schnauzer that has correct movement. It does not justify moving close, toeing in, crossing, or moving out at the elbows. Viewed from the side, the forelegs have good reach, while the hind legs have strong drive, with good pickup of hocks. The feet turn neither inward nor outward. Faults - Single tracking, sidegaiting, paddling in front, or hackney action. Weak rear action.

Temperament: The typical Miniature Schnauzer is alert and spirited, yet obedient to command. He is friendly, intelligent and willing to please. He should never be overaggressive or timid.

Disqualifications: Dogs or bitches under 12 inches or over 14 inches. Dogs not of an allowed color or white striping, patching, or spotting on the colored areas of the dog, except for the small white spot permitted on the chest of the black. The body coat color in salt and pepper and black and silver fades out to light gray or silver white under the throat and across the chest. Between them there exists a natural body coat color. Any irregular or connecting blaze or white mark in this section is considered a white patch on the body, which is also a disqualification. Nose any color other than solid black.
